Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Monday 20 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Some brighter spells developing on Monday.

Today:
Another cloudy start for most, with hill fog patches, and although mostly dry there could be the odd spot of light drizzle. Cloud should gradually lift with some breaks developing to allow occasional brighter spells. Feeling rather chilly. Maximum temperature 6 deg C (43 deg F).

Tonight:
Dry with light winds and occasional clear spells. This will allow frost to develop a little more widely, with the odd fog patch also possible. Minimum temperature -1 deg C (30 deg F).

Tuesday:
A dry day with bright spells developing more widely. However, it will be a chilly day, with a frost early and late. Maximum temperature 3 deg C (37 deg F).

Outlook for Wednesday to Friday:
Wednesday, bright, frosty start. Cloud thickening later, patchy rain reaching the west, perhaps briefly wintry. Thursday and Christmas Eve, often rather cloudy. some rain at times, possibly wintry on hills.
